Information Systems student and software developer focused on modern architectures, utilizing technologies such as Angular, Java (Spring Boot), and microservices. Known for my proactive approach, quick technical learning curve, and teaching background; qualities that enable me to work collaboratively and act as a bridge between system logic and user experience. I am seeking to join a challenging development environment where I can design scalable applications, ensure code quality, and continue my professional evolution toward systems architecture.

EDUCATION

- **Bachelor of Information Systems / Systems Analyst** (2024 - Present)
UADER - FCyT.
